

# Non-Intrusive Inspection Services

## About NII Services

- > Cotecna's state-of-the-art NII solutions provide Customs and Ports authorities with comprehensive solutions to facilitate cargo clearance, and combat fraud and smuggling.
- > Cotecna always designs customized solutions that best fits our clients' specific needs and environment.

## Key Benefits

-  Optimizes revenue collection and increase security;
-  Enhances trade facilitation by reducing physical inspections;
-  Enables ports and borders decongestion;
-  Guarantees a high operational and technical scanner availability;
-  Detects and deters fraudulent behaviours;
-  Participates in the modernization reforms of our clients;
-  Allows Customs to focus on their core and sovereign activities.

## Are you getting the best of your NII technologies?

When it comes to implementing an efficient Non-Intrusive Inspection solution, challenges are real for authorities in charge: equipment selection, project funding or lack of human resources.

Relying on our leading and proven field experience acquired since 1999, we assist our clients to enhance the efficiency of controls whilst facilitating trade.

We understand the intricacies of the scanning technology, ensuring its seamless integration into existing systems and processes. With more than 50 scanners installed worldwide we have the proficiency to operate the scanner efficiently, maximizing its potential for detecting contraband and illicit goods while minimizing disruptions to legitimate trade.

From conception to operation and maintenance we ensure optimal operations for our clients, with minimal downtime and efficient operational processes to effectively balance enforcement and facilitation.

Being fully independent from any manufacturer, we put to use our unique expertise to offer modular and scalable services.

## Choose a recognized partner for all your NII needs

### A successful partnership: El Salvador

In 2012, Cotecna was contracted by the Government of El Salvador for the implementation of a 100% scanning scheme throughout the country.

Deployed in less than 8 months, our comprehensive solution encompasses financing, complete civil works, provision, operation and maintenance of various X-Ray scanners, video surveillance, container and vehicle identification systems and weighbridges.

These technologies are all operating 24/7 and monitored from a remote Customs Inspection Supervision Centre designed, built and fully equipped by Cotecna.

Under challenging conditions, Cotecna delivered a solution that fully meets the client's needs and brings many tangible benefits for El Salvador Customs and a positive impact on its economy including:

- > Effective Implementation of a 100% scanning scheme at the port
- > Customs clearance time reduced from 12 days to 1 day at certain borders
- > Inspection time reduced from up to 24 hours to 15 minutes
- > Improved efficiency and transparency of image analysis process
- > Noticeable improvements in trade facilitation: Salvadoran international transit and dwell times are now amongst the best in the region
- > Better operational controls by Customs Authorities
- > Effective modernization of Salvadoran Customs'

### About Cotecna
